Economical and efficient for purifying tap water, 1THE Water Filter System is the most inexpensive method of removing 90% to 99% of all contaminants and capable of rejecting practically all particles, bacteria and organics. 1THE Water Filter System is inexpensive way to get clean purify water.

Function of each Filter

* 1THE Mineral Pro Set : Sediment + Mineral + Post-carbon

* 1THE Extra Clean Set : Sediment + UF membrane + Post-carbon

STEP01

Sediment

This filter has an excellent effect to remove dust and particles from the water. It plays a role of improving the normal activity of the other filter due to the basic filtration process.

STEP02

Mineral

This functional filter elutes minerals and it increases pH level and provides weak alkali water. Also it has antioxidant effect which decreases ORP level of original water. This functional filter improves the water taste because it is equipped with activated carbon.

UF membrane

This filter has a function that passes through the inflow of minerals at the same time as removing the microbes, turbidity-causing substances.

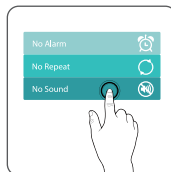

STEP03

Post-carbon

This filter absorbs organic chemicals (chlorine, disinfection by-products, etc.) and removes it. And the filter improves the taste of weak alkaline mineral water.

Mobile Function (QR code)

- > 1THE Alarm application will let you know when the time comes to replace the water filters.
- > By replacing the water filter in a timely manner, you can drink more fresh and clean water.

* Free water filter replacement alarm application for both Apple and Android.

The background features several thick, stylized lines. A prominent blue line starts from the top left and extends diagonally towards the bottom right. Two grey lines also follow a similar diagonal path, one positioned above and one below the blue line. These lines have rounded, curved ends, creating a sense of movement and flow. The overall composition is minimalist and modern.
